**WEBINAR ON
SOFT SKILL TRAINING**

In today's competitive world, the students who passed out of graduation not only have to make right career choices, they also have to be prepared to face the professional world by honing their soft skills. Whether they take up further studies or decide to go for a job, they have to overcome the hurdles of group discussion and personal interview. Many students falter at this stage.

It is here that we, as educators, have to step in.

In our endeavor towards building bridges with educational institutions in Kerala and as a student-centric initiative, we would like to address the students of your esteemed institution to equip them with the skills and confidence required to face the challenges in their career.

An interactive session of 40-45 minutes, on a date and time as per your convenience, would suffice to meet this objective. During this session, it will be our endeavor to address each and every query raised by the students.
